PRESIDENT'S 2019 B.B.Q.

President's B.B.Q. is on the **17th March** at 12 mid-day. [NOT in February as previously announced.]

Address is 27 Jubilee Ave, Ulladulla.

More details at February Meeting.

CHRISTMAS PARTY & 2018 PRESENTATION

The Christmas Party went very well. There were great raffles and we each got a lovely orchid seedling. Plus the company was friendly—full of Christmas cheer. The entertainment was enjoyable although the trivia comp. was a tad difficult. :) A.M.

The food was plentiful and scrumptious. [There was more but it wouldn't fit in the picture].

There was lots of chatting and people changing seats, to talk to fellow members. Decorations every where made it festive.

We each got a mini cake as a gift [thank you to the giver. :)]

Third prize in the raffle was this hamper—I won it. :) **Page 2**

Thank you to the many helpers. We appreciate your efforts.

NOVICE CORNER BY A.M.C. & J.C.

GROW Orchids
TIPS FOR BEGINNERS

As promised last newsletter here is Barbara's Eco-Insecticide Recipe [bee friendly].

Home made organic type white oil.
1 litre of canola oil
100 mls of eucalyptus oil
10 mls dish washing liquid
1/2 litre of water

- 1] Put this in a old soft drink bottle.
- 2] Shake and label the bottle with the name.
- 3] Take 40ml of this mix with 1 litre of water in a sprayer.
- 4] Spray all parts of the plant.
- 5] Repeat in a few weeks.

Virtual orchid crawl

continues next news-
letter—PLEASE send in
photos of your orchid
growing areas. The
orchids do not need to be
in flower.

Thank you, A.M. :)

My apologies to Barbara for misspelling her name—it is Barbara Haywood, not Barbara Hayward.

LIGHT—How much does my orchid need?

Orchid light requirements

Light level	Low-medium	Medium	Medium-high
Foot-candles	1000-1500	1500-3000	3000-4500
Lux	10,000-16,000	17,000-30,000	32,000-50,000
Shadow cast	Indistinct border	Soft border	Distinct border
Approx shade cloth%	80%+	50-60%	30-40%

If like me, you don't understand about light intensity—this may help you. Often articles refer to light in different ways, so this chart makes it easier to understand. Also there are instruments which can be bought, that measure light using foot-candles or Lux.

Examples of low to medium light orchids are— Paphiopedilum, Masdevallia, Sarcocochilus (summer), Odontoglossum, Stanhopea, Miltonia (summer) .

Medium light orchids are— Soft Cane Dendrobium (summer), Coelogyne (summer), Brassavola, Brassia, Calanthe, Cochlioda, Encyclia, Cattleya (summer).

Medium to high light orchids are—Thelychiton (hard cane Dendrobium), Vanda, Epidendrum, Laelia, Soft cane Dendrobium (winter) or near full sun, Bletilla, Phragmipedium.

Hope this helps you, fellow Novices. :) A.M. & J.C.

If you have a chance to go to the Orchid Workshop in Batemans Bay [information is on page 4 of this newsletter] , go for it. It is a rare opportunity to listen to 4 excellent speakers and to also have the opportunity to buy orchids and flasks from them, without having to pay postage or order sight unseen. I'll be there and so will be J.C. :) Cheers A.M. :)

Congratulations to Jo Church and Helen Douglass for going up to Intermediate Level.

Your orchids inspire us all to try harder. Well done. :)

 Keith Forster - Manager

The Committee
 -would like to thank those generous members that provide the goodies for afternoon tea and also the members who bring in plants etc., for our monthly raffles. Also we thank the people who help set up and clean up the hall—as with many hands it doesn't take very long. :)

-REMEMBER -
 Please do not water your plants before benching them, at our meetings or shows, as it makes quite a mess.
 Thank you. :)
